

DigiWrap (Fingers)

DigiWrap Too (Toes)

Special 1/16" neoprene provides comfortable uniform compression to injured proximal interphalangeal or PIP joint while permitting the early range of motion critical for joint healing. To accelerate healing process and prevent joint stiffness, orthopaedic and hand surgeons recommend early motion for most finger joint sprains. Latex-free. Use to treat sprains and minor fractures of the proximal interphalangeal joint and stable minor fractures. Convenient, cost effective method of "buddy splinting" without messy adhesive tape. Available in six sizes based on circumference measurement of injured finger or toe. Multi-pack contains one of each six sizes.

Convenient Design

- Developed by an orthopedic surgeon
- Allows athletic participation
- Accelerates healing by allowing free motion of injured joint
- Applies easily and quickly
- Eliminates need for frequent re-tapings

Effective Treatment For:

- Closed fractures of lesser fingers/toes
- Soft-tissue injuries
- Dislocations
- Joint injuries

DigiWrap (fingers)

ORDER #	SIZE	MEASUREMENTS
10321	1	2 1/4" or less
10322	2	2 1/4 - 2 1/2"
10323	3	2 1/2 - 2 3/4"
10324	4	2 3/4 - 3"
10325	5	3 - 3 1/4"
10326	6	3 1/4 - 3 1/2"
10327		Multi-pack: Sizes 1 - 6

DigiWrap (toes)

ORDER #	SIZE	MEASUREMENTS
10331	1	2 1/4" or less
10332	2	2 1/4 - 2 1/2"
10333	3	2 1/2 - 2 3/4"
10334	4	2 3/4 - 3"
10335	5	3 - 3 1/4"
10336	6	3 1/4 - 3 1/2"
10337		Multi-pack: Sizes 1 - 6

Material content: Neoprene, latex-free
